

How to craft your chosen sculpture

To create your mobile:

1. Tie the paper clip to the end of your string and open the clip to form a hook
2. Cut the string to a suitable length for hanging
3. Tie the weight onto the end opposite the clip
4. Add a spot of all-purpose glue to the back of your sculpture, in the centre, and glue it onto the string
5. Add more sculptures at will and hang it up so that any moving air will cause it to turn

To create your tree decoration:

1. Install a spot of all-purpose glue to the back of your sculpture, in the centre, then place the centre of your plastic-coated twist tie into the glue
2. Place to one side to set
3. Hold the sculpture in position on your tree branch
4. Twist the ends of your twisty to attach your sculpture onto the branch
